New Tinting Policy for Polarized and Transitions® Lenses

Our primary goal has always been to provide the highest quality eyewear while still accommodating the requests of your patients.

As you may be aware, some managed care providers have prohibited the use of tint over top of polarized and Transitions lenses due to potential film damage, performance impacts and patient safety concerns.

Regarding Transitions lenses, with the use of tintable hard coats, any subsequent tinting of the lens may adversely affect its performance characteristics, including but not limited to the photochromic performance and color/hue. The same can be true for polarized lenses. Going forward, beginning Monday, August 22nd, 2022, Interstate Lab Group will no longer be tinting over polarized or Transitions lenses. *Any order currently in process will be completed as originally requested.*

There are many products available which will provide your patients with a wide variety of polarized and Transitions lens choices. We have provided quick links to our website (below) so you may browse available polarized and Transitions lens options. Our customer service team is always available to help with recommendations as well.

Meet The People Who Make Up the Interstate Team!

Matt Long has been with Interstate Lab Group for over eleven years in our Indianapolis facility. Throughout his tenure, Matt has worked throughout the lab, in the Lens department, Customer Service, Data Entry, receiving Frames, Surfacing and as a Production Manager.

A fun fact about Matt is he spent twelve years in Europe.

We are happy to have Matt as a valued member of the Interstate Team!
